Index to Volume 12, 1910.

A.

Adding steel to cast iron in the cupola, 140
Alloys of copper, aluminium and manganese, 90
Alloys of nickel and cobalt with chromium, the production of, 660
Alloys, some common defects occurring in, 584
Aluminium and the brass founder, 144
Aluminium, copper-hardened, 658
Aluminium for gas-engine cylinders, 300
Aluminium-zinc alloys for casting, the value and defects of, 293
American foundry, a modern, 187
American Foundrymen's Association, Annual Convention, 369
American Foundrymen's Convention, the forthcoming, 252
Analysis of aluminium and its alloys, 85
Annealing ores, the comparative value of foundry, 600
Anti-friction alloys, bearing metals, or, 583
Arc furnace, electric steel refining in the, 254
Artificial moulding sands, 364
Association Technique de Fonderie, 347
Automobile parts, malleable castings for, 32

B.

Base plates, pattern-shop preparations for moulding large, 653
Bearing, core-box for a, to receive white metal lining, 609
Bearing metals, or anti-friction alloys, 583
Blowers, Roots', 655
Boiler cleaner, moulding a, 599
Books, reviews of (see under F.T.J. Bookshelf)
Bosshardt casting process, 139
Brass alloys, constitution of the, 488
Brass castings often fail, why, 359
Brass, chromium as a constituent of, 314
Brass foundry crucible melting furnaces, 19, 75
Brass foundry, fluxes as applied to the, 537
Brass foundry, magnesium as a deoxidiser in the, 301
Brass foundry refuse, the selling of, 550
Brass, the heat treatment of, 598
Briquetting metal turnings, 29
Bronzes, modern, 18
Business methods for the ironfounder:—
  Costings, 305
  Wages and bonus systems, 419
  Metal stocks and waste in melting, 242
  Patterns and manufactured stock records, 602
Buying carbon tool steel on specification, 38

British Foundrymen's Association.

Report of the Council, 405

ANNUAL CONVENTION, 458

  Presidential Address, 463
  Papers read:—
  The Cupola, 474
  Cupola slags, 477
  Malleable cast iron; some of its features and how it is made in Sweden, 482
  Hardness testing of cast iron, 484
  Coke and its properties, 486
  Constitution of the brass alloys, 488
  Theory of malleableising, 491
  The electric furnace, 494
  Visits to works, 543
  Pillars of the British Foundrymen's Association, 540

BIRMINGHAM BRANCH.

  Annual meeting, 372
  Cores and core binders, 34
  Cupola slags, 598
  Cylinder moulding for railway engines, 348
  Microscopic analysis of cast iron, 186
  Moulding sands, 181
  Physical properties of foundry coke, 258
  Presidential address, 581
  Progress of machine moulding, 11
  Roots' blowers, 655
  Visit to Daimler's Motor Works, 361
  Visit to Edgwick Works Foundry, Coventry, 597
  Visit to James Fairley & Son's Works, 46
  Visit to Watt Museum, 256

LANCASHIRE BRANCH.

  Annual meeting, 293
  Carbon: Its properties and relation to cast iron, 152
  Coke for foundry purposes, 208
  Crystallisation and the effects of various elements on cast iron, 262
  Notes on contraction, 645

SHEFFIELD BRANCH.

  Heat values of fuels, 79
  Modern bronzes, 18

C.

Cadmium, the uses of, 636
Calculating the average price of castings, 203
Canadian steel foundry, 313
Carbon; its properties and relation to cast iron, 152
Carbon, sulphur and silicon, effects of, on commercial cast iron, 551
Case-hardening, 422
Cast copper of high electric conductivity, 648
Casting-on liners on iron pump rams, 33
Chemical standards for iron castings, 371, 425
Chromium as a constituent of brass, 314
Clean castings, moulding to obtain, 80
Coal, a pulveriser for foundry, 37
Coke and its properties, 486
Coke for foundry purposes, 208
Coke, physical properties of foundry, 258
Coke, specifications for foundry, 370
Collapsing core bar for small pipe bends, 595
Comparative values of foundry annealing ores, the, 600
Contraction, notes on, 645
Copes, temporary wooden, 649
Copper, aluminium, and manganese, alloys of, 90
Copper-arsenic alloys, the properties and constitution of, 84
Copper-hardened aluminium, 658
Copper of high electric conductivity, cast, 648
Cores and core binders, 34
Core bar, collapsing, for small pipe bends, 595
Core-box for a bearing to receive white metal lining, 609
Corners on castings, 421
Cost of electric steel refining, 22
Crane, a foundry, 127
Crucible melting furnaces, brass foundry, 19, 75
Crystallisation and the effects of various elements on cast iron, 262
Cupola, the, 474
Cupola furnaces, points in working, 67
Cupolas, a spark arrester for, 248
Cupola slags, 477
Cupola slags, 598

Cupola, the working of a, 294
Cupola, the working of a, 596
Cylinder moulding for railway engines, 348

Correspondence.

Cast iron and superheated steam, 497
Locomotive cylinders and chemical analysis, 160
Manganese bronze, 40
Moulding machines, the use of, 381, 436

D.

Daimler's Motor Works, Foundrymen's visit to, 361
Defects occurring in alloys, some common, 584
Duralumin, 658
Dust removal in foundries, 133

E.

Edgwick Works Foundry, Coventry, 597
Education of the foundryman, 581
Electrical production of steel, automatically circulating furnaces for the, 403
Electric furnace, the, 494
Electric furnace, Girod, for steel castings, 297
Electric furnace test, 162
Electric pig-iron, experiments with, 304
Electric steel furnace, temperatures of the, 536
Electric steel processes, present status of, 641
Electric steel refining, cost of, 22
Electric steel refining in the arc furnace, 254
Electro-Bessemer process, a new, 317
Exhibition of castings and models, 366

F.

False backs, plaster, for hand-moulding, 142
Ferro-silicon, nature and uses of, 88
Flasks, snap, 135
Fluxes as applied to the brass foundry, 537
Founders' Company, exhibition of castings and models, 366
Foundries at the locomotive works at Crewe, 638
Foundry crane, 127
Foundry management in relation to metal stocks and waste in melting, 242
Foundry practice, 191
Fuels, heat values of, 79
Furnaces, brass-foundry crucible melting, 19, 75
Furnaces for the electrical production of steel, automatically circulating, 403
Furnaces, open-hearth, at the New York State Steel Company's Works, 138
Furnaces, points in working cupola, 67

Foundry Plant and Equipment.

Blowers, positive pressure, 207
Cinder mill, the "Climax," 89
Core-drying stove, 321
Core machine, a new "Wadsworth," 431
Core-making machine, a useful, 31
Core-making machines, modern, 606
Core oven, a useful, 433
Crucible furnace, the, "Monarch" stationary, 147
Crucible furnace, oil-fired, 319
Electric lights for foundries, 320
Fillet, a new type of, 320
Glue pot, an electrically heated, 664
Grinding coal dust, 264
Lifting magnet, "Skull Cracker," 265
Mechanical pattern-maker, the "Wadkin," 496
Mould drier, portable, 97
Moulding machine, the "Adaptable," 553
Moulding machines, adjustable flask-stripping, 318
Moulding machine, hand-ramming, 553
Moulding machine, the "Osborn" jolt, 264
Moulding machine, the "Rapid," 98
Moulding machines, some German, 607, 663
Moulding machine, pneumatic, the "Farwell," 662
Oil furnace, the "Buess," 378
Oil-fired furnace, the "Empire" rolling metal-melting, 206
Pattern-plate apparatus, the "Coventry," 607
Pulveriser for foundry coal, 37
Pyrometers, indicating and recording, 377
Sand-blast apparatus, a high-pressure, 321
Sand sifter and mixer, the "Bilz," 141
Sawing, planing, and thicknessing machine, 433
Setting-out frames, method of operating, 433
Tilting fore-hearth for the cupola, 552
Turbine blowers, 429
Water cinder mill, an improved, 97
Woodworker, a portable combination, 552

F.T.J. Bookshelf.

Blast-furnace practice, by Morgan, 39
Enamelling on iron and steel, by Grünwald, 39
Encyclopædia of practical engineering and allied trades, 151
Engineering workshop machines and processes, by Zur Nedden, 266
Fuel and refractory materials, by Sexton, 151
General foundry practice, by Roxburgh, 497
Publications received, 210
Handbook for ironfounders, 497
Iron and steel analysis, Vol. I., by Campion, 612
Journal of the Institute of Metals, 151
Journal of the Iron and Steel Institute, 151
Mechanical engineering of power plants, by Hutton, 39
"Mechanical World" pocket-book, 40
Metallography, by Desch, 265
Metallography as applied to Siderugic products, by Savoia, 266
Principles and practice of ironfounding, by Rhead, 324
Publications and catalogues received, 100, 151

G.

German methods of moulding for cast-iron pipes, 240
German silver for casting purposes, 251
Girod electric furnace for steel castings, 297
Gosforth Foundry Company, Limited, new works of the, 531
Grinding department, the equipment of the, 197, 253, 309
Gronwall furnace, developments of the, 495
Growth of cast iron, 637

H.

Handling and storing stock machinery parts, 367
Hardness testing of cast iron, 484
Heat treatment of brass, the, 598
Heat values of fuels, 79

I.

Influence of silicon on pure cast iron, 585
Influence of top-lag on the depth of pipe in steel ingots, 78
Institute of Metals, 84, 524, 637

J.

Japan-British Exhibition, 368
Jobbing foundry methods, 640
Jobbing foundry, moulding machines in the, 315

L.

Large casting for Italy, 365
Large steel castings in transit, 128
Lathe gantry, moulding box for a, 87
Lifting magnet, a "skull-cracker," 265
Liners on iron pump rams, "casting on," 33
Loam core, strengthening a, 143
Locomotive cylinders, vanadium cast iron for, 647
L. & N.-W. Railway Works at Crewe, 638
L. Y. Railway, locomotive works of the, 546

M.

Machine-made moulds for casting pipes on end, 409
Machine moulding, 525
Machine-moulded open gears, 650
Machine moulding, progress of, 11
Magnesium as a deoxidiser in the brass foundry, 301

Malleable castings for automobile parts, 32
Malleable cast iron, 482
Malleable cast iron, 665
Malleableising, theory of, 491
Manganese sulphide in iron and steel, 150
Metal cutting by oxygen and acetylene, 661
Metallography as an aid to the brass founder, 592
Mixing of irons for special castings, practical hints on the, 307
Modern bronzes, 18
Mould boxes in the foundry, 189
Moulding a boiler cleaner, 599
Moulding box for a lathe gantry, 87
Moulding box system, a new, 152
Moulding machines (see under Foundry Plant and Equipment)
Moulding machines in the jobbing foundry, 315
Moulding sands, 181
Moulding sands, artificial, 364
Moulding to obtain clean castings, 80

N.

National Physical Laboratory, 210
New testing machines, 24
Nickel and cobalt with chromium, the production of alloys of, 660

Notes and Comments.

Alloys in the crucible, making, 180
Aluminium in brass, 524
Analysis of metals, 293
Analyses, the matter of, 523
Annual conference of British Foundrymen's Association, 236
Annual meeting of Institute of Metals, 636
Bell criticised, a well-known, 235
Bell metals, 236
Brass foundry requirements, 580
British pig-iron in 1909, 10
Business methods in the foundry, 579
Calcium silicide in steel works, 636
Carborundum in the foundry, 124
Cast iron for superheated steam, 66
Copper-aluminium-manganese alloys, 65
Copper casting problem, solution of a, 635
Decade of progress, a, 291
Defects of Big Ben, the, 235
Deoxidiser for the steel foundry, 180
Electric furnace, some advantages of the, 292
Electric smelting of iron ore, 524
Event of the foundry year, the, 457
Exhibition of foundry work, 345
Famous bells, 236
Ferro-silicon and its dangers, 66
Founders' Company Exhibition, the, 10
Foundrymen's Association at Glasgow, 124
Ground ferro-phosphorus in the foundry, 10
Inventor of the open-hearth steel process, 347
New Year and foundry progress, the, 9
Pattern shop economy, 179
Powdered fuel, 66
Progress of the British Foundrymen's Association, 401
Properties of foundry coke, 236
Selling of pig-iron, 125
Selling of pig-iron by analysis, 123
Specifications for phosphor-bronze, 580
Standardisation of foundry flasks, 523
Steel foundry possibilities, 292
Value of the electrical iron-smelting furnace, 402
Value of the trained man, 180
Vanadium in cast iron, 402
Where Britain lags behind, 346

O

Open-hearth furnaces at the New York State Steel Company's works, 138
Overhead tram rails in the foundry, 248
Oxy-acetylene welding, the "Incanto" system, 604
Oxygen and acetylene, metal cutting by, 661

P.

Pattern-shop preparations for moulding large base plates, 653
Phosphor bronze, a contribution to the study of, 85
Phosphor bronze, notes on the preparation of, 204
Physical properties of foundry coke, 258
Pig-iron steel, 67
Pillars of the British Foundrymen's Association, 540
Pipes, German methods of moulding for cast iron, 240
Pipes, machine-made moulds for casting on end, 409
Piping in steel ingots, preventing, 252
Plaster blocks for moulding machines, 376
Plaster false backs for hand moulding, 142
Plaster of Paris in the pattern shop, 247
Points in working cupola furnaces, 67
Pouring ladles in the steel foundry, 535
Present position of the iron-founding industry, 73
Price of castings, calculating the average, 203
Progress of machine moulding, 11
Publications received (see F.T.J. Bookshelf).
Purifier for cupola gases, 147

Q.

Queries and replies, 41, 100, 160, 381, 498, 562, 618, 672

R.

Refractory materials for furnace construction, 374
Report on cast-iron test bars, 27
Reviews of books (see F.T.J. Bookshelf).
Runners, gates, and dirty castings, 193

S.

Sæculoria bronze, 661
Sand mixing machine, 148
Scrap brass, the advantages and disadvantages of using, 347
Segregation phenomena in steel castings, 244
Segregation, the influence of, on steel ingots, 539
Selling of brass foundry refuse, 550
Shockless jarring machine, 356
Sinking heads, the effects of, on large castings, 424
Silicon, the influence of, on pure cast iron, 585
Snap flasks, 135
Spark arrester for cupolas, 248
Specifications for foundry coke, 370
Spur gears, machine moulded, 650
Stacking of moulds, 83
Status of electric steel processes, present, 641
Steel castings, large, in transit, 128
Steel castings, segregation phenomena in, 244
Steel foundry, a Canadian, 313
Steel foundry, pouring ladles in the, 535
Steel foundry practice, 131
Steel to cast iron in the cupola, adding, 140
Stereotype plates, casting, 237, 302
Stopping off, 261
Strengthening a loam core, 143
Sulzer Foundry, Winterthur, 69
Superheated steam, the effect of, on cast iron and steel, 94
Discussion on, 417, 532

T.

Tees-side foundry, a, 407
Temperatures of the electric steel furnace, 536
Test bars, report on cast-iron, 27
Testing machines, new, 24
Tests of cast iron, some recent, 652
Thermit welding, 30
Tinning of metals, a process for the, 77
Tool steel on specification, buying carbon, 38
Top-log, influence of, on depth of pipe in steel ingots, 78
Tram rails, overhead, in the foundry, 249
Turnings, briquetting metal, 29
Tweedales & Smalley Limited, works of, 543

V.

Vanadium cast iron for locomotive cylinders, 647
Vapouriser in brass, casting a, 427

Watt Museum, Birmingham, foundrymen's visit to the, 256
Welding cast iron, 598
Welding, the "Incanto" oxy-acetylene system, 604
Welding, Thermit, 30
Wilsons, Pease & Company, Limited foundry, 407
Wood worker, a comprehensive, 148
Wooden copes, temporary, 649
Working of a cupola, 294
Working of a cupola, the, 596

Paragraphs.

Anglo-Japanese steel foundry, 296
Brass castings and match tubing, 305
British *v.* foreign moulding machines, 665
Carborundum fire sand, 26
Cast-iron borings in the foundry, 531
Crucible steel manufacture in France, 644
Electric steel works in Russia, 534
Engineering exhibition at Manchester, 604
Innovation in steel manufacture, 355
Institute of Metals, 306
International Testing Association, committees of the, 44
Iron in aluminium chips, 428
Iron in brass castings, 308
Making of modern grinding wheels, 363
Manganese in Britannia metal, 312
Manufacture of carbon electrodes in Sweden, 551
Moulds for cooling aluminium, 38
Nickel-bronze gears, 137
Nickel-bronze gears, mixtures for, 160
Oil fuel for open-hearth furnaces, 601
Open-hearth furnace record, 534
Osborn spark arrester for cupolas, 657
Pattern lathe, turning smooth on the, 659
Silicon metal, 48
Silicon steel, 661
Value of technical education, the, 196
Volume and weight of alloys, 408
